

I've learned that Sinclair Broadcasting has decided to force their stations to air an anti-Kerry documentary days before the election. This is an unfair use of their use of the spectrum for broadcasting. Airing a partisan program is not in the public interest, unless they also air a countervailing program about President Bush, or an opposing view about John Kerry.

I think we need to need to be more stringent about monitoring the rules for media ownership. I object strenuously to the airing of one-sided political "documentaries." Please take this into account when their application for lincense renewal reaches your desk.

Thank you.
